GET IDENTITY

VERSATILE CARD PERSONALIZATION AND ISSUANCE

GET Identity is a comprehensive card personalization software designed to provide organizations with the ability to create, manage, personalize and issue a wide range of card types.

The system's open architecture supports a wide range of features that can be easily grouped and utilized by small and large organizations, and its multi-tier nature allows it to work with different database engines.

THE SMART PLATFORM FOR CARD ISSUANCE

GET GROUP

■ **An intelligent card issuance solution with customized workflows, and works independently of hardware platforms**

■ **User-friendly and versatile with rich design tools, a library of templates and drag-and-drop functionality**

■ **Reduces the cost and complexity of contact, contactless and magnetic stripe card encoding and barcode/QR code generation**
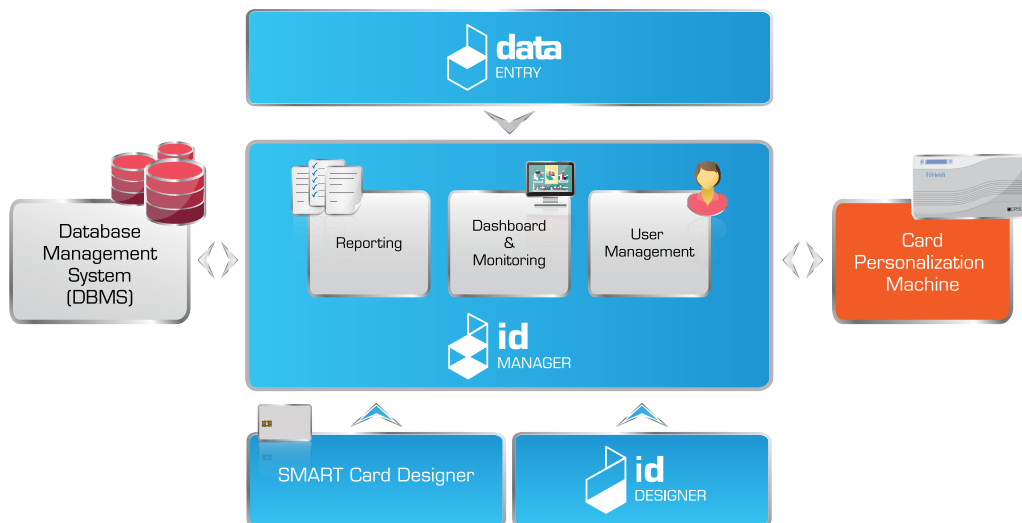

Components

ID Designer

The ID Designer is a feature-rich tool for the design of the graphical and logical structure of the card. It supports various static and dynamic elements including text, images, shapes, layers, and complex items. Additionally, the ID Designer module incorporates a smartcard unit responsible for designing the encoded structure of smart cards.

ID Manager

The ID Manager module provides the administrator with a user-friendly interface to set the data source, design and customize the data-entry interface, create roles and users, assign relevant permissions, and generate reports.

Data Entry

The Data Entry module supports direct issuance operations with a dynamic data-entry screen, instant print preview, and various tools to add and edit records. The data on the cards is imported from the data source defined by the ID Manager.

Software Specifications

Feature List	Basic	Advanced	Enterprise
Dual Side Template Design	✔	✔	✔
System Predefined Templates	✔	✔	✔
Multiple Views/Pages/Layers	✔	✔	✔
Static/Variable Data Field *(Text, Image, Date, MRZ, Graphic fields)*	✔	✔	✔
Composite Data Field	✔	✔	✔
Add, Save and Search Data Records	✔	✔	✔
Barcode, Magnetic Strip and QR Code Support	✔	✔	✔
Create/Customize own Template Design	✔	✔	✔
Automatic Database Creation and Configuration *(Access)*	✔	✔	✔
Customize Data Entry Form Design	✔	✔	✔
Instant Printing Preview	✔	✔	✔
Variable Data Field Import/Export *(Excel, csv, Text)*		✔	✔
Multi-Table databases *(MS Access, MSSQL, MySQL)*		✔	✔
Multisite Configuration		✔	✔
Centralized Users Management		✔	✔
Dashboard and Reporting *(Standard/Customized)*		✔	✔
Export Report to Excel		✔	✔
Image Processing and Enhancement		✔	✔
Central Data Management		✔	✔
Smart Card Encoding *(Mifare Classic, Mifare DESfire)*		✔	✔
Smart Card Designer		✔	✔
Integrated Signature Capture [1]			✔
Integrated Fingerprint Capture [1]			✔
Integrated Face Capture [1]			✔
Oracle Database Support [1]			✔
Microsoft Active Directory/LDAP Support			✔
External HRMS integration Support [2]			✔

Operating system: Microsoft windows 7/ Windows 8.1/ Windows 10 (32-bit or 64-bit)

*1 Development and integration services required to support new devices that are not listed
*2 (Optional) standard link to HRMS will be provided, development required to support new functionalities

GET Identity empowers its users with the following benefits:

- A high-performance solution supporting concurrent transactions
- Easy-to-use modules, screens and tools
- Easy data management through customized data entry screens
- Supports GET Group's card printers, and can seamlessly integrate with other printers
- The solution includes standard reporting templates, a dashboard, and tools for report customization and monitoring
